(Deemed to be University under section 3 of the UGC Act 1956)

Nursing

Instructions:

1. Answer all the questions.
2. Read each question carefully and write the correct answer for each question chosen by you with black/blue pen in the answer sheet provided.
3. No negative marks for wrong answers.
4. Return the question paper along with the answer sheet.

Time: 90 Minutes

Venue: _____.

Part B

[35X1=35]

1. The uniform method of assessing students overall learning would be
 - a. Objective structured clinical evaluation
 - b. Case method
 - c. Group project
 - d. Viva voice
2. A nurse educator is interested to teach physical examination to nursing students. The best suitable method would be
 - a. Lecture
 - b. Demonstration
 - c. Project
 - d. Bed side clinic
3. The TB Surveillance using case based web based IT system is
 - a. NITI Aayog
 - b. RBSK
 - c. MOLSHY
 - d. NSSK

4. Human anatomical waste should be discarded in category
 - a. Yellow
 - b. Red
 - c. Blue
 - d. Black
5. Which of the following vaccine is contraindicated in pregnancy?
 - a. MMR
 - b. DPT
 - c. DT
 - d. Hepatitis B
6. Guthrie test is useful for screening
 - a. Pompe's disease
 - b. Phenylketonuria
 - c. Thalassemia
 - d. Hemophilia
7. Among the following identify the mRNA (Messenger RNA) Vaccine.
 - a. Covishield
 - b. Covaxin
 - c. Pfizer-BioNTech's Covid Vaccine
 - d. ZyCoV-D
8. Zika virus is transmitted through the bite of an infected
 - a. Aedes aegypti mosquito
 - b. Culex mosquito
 - c. Anopheles mosquito
 - d. Aquatic snails
9. NACO has branded STI/RTI services as
 - a. Suraksha Clinic
 - b. Surabi Clinic
 - c. Sushma Clinic
 - d. Shruthi Clinic
10. The safe period method is also called as
 - a. Basal Body temperature method
 - b. Programmed sex
 - c. Cervical mucus method
 - d. Abstinence

11. A 6-month old child woke up in the night crying with abdominal pain which got relieved on passing red stools. What is the diagnosis?
 - a. Meckel's diverticulum
 - b. Intussusception
 - c. Malrotation
 - d. Intestinal obstruction

12. Normal Heart rate at birth is
 - a. < 100 beats/mt
 - b. 100-120 beats/mt
 - c. 120-160 beats/mt
 - d. 160-180 beats/mt

13. The most common cause of dementia is
 - a. Alzheimer's disease
 - b. Multiple sclerosis
 - c. Multi infarct lesion
 - d. General paresis of insane

14. First antipsychotic drug introduced was
 - a. Chlorpromazine
 - b. Haloperidol
 - c. Trifluoperazine
 - d. Lithium

15. Delirium is the disorder of
 - a. Consciousness
 - b. Perception
 - c. Memory
 - d. Thought

16. Korsakoff's psychosis is due to the deficiency of
 - a. Thiamine
 - b. Riboflavin
 - c. Vitamin B12
 - d. Biotin

17. The first step of the research process is to
 - a. Prepare the research design
 - b. Complete data collection and analysis
 - c. Formulate the research question
 - d. Prepare the report

18. The scientific method focus on testing hypotheses developed from hypothesis?
- Deductive Method
 - Inductive Method
 - Hypothesis Method
 - Pattern Method
19. Dependent variable refers to
- The experimental condition
 - The variable which shows us the effect of the manipulation
 - The variable being manipulated or varied in some way by the research
 - A variable with a single value which remains constant in a particular context
20. A Type II error is also known as
- False positive
 - False negative
 - Double negative
 - Positive negative
21. Biased research refers to
- Drawing conclusions by introducing one's own vested interest.
 - No deliberate attempt to either conceal or highlight something.
 - Repeatability and accuracy are provided for the quality of measurement procedures used.
 - Each step of the research is valid and objective
22. Descriptive research is the type of research that
- Is made for performing the basic or pure research; it's a theoretical research.
 - Is intended for finding some solution to the problem considered
 - Includes fact-finding enquires and surveys
 - Uses available information as the base to make the further critical evaluation
23. Conducting surveys is the most common method of generating
- Primary data
 - Secondary data
 - Qualitative data
 - Quantitative data
24. Research can be classified from three perspectives
- Application, objectives and inquiry mode used
 - Philosophies, validity and unbiased
 - Controlled, systematic and empirical
 - Rigorous, valid and critical

25. Conclusive evidence of intra-uterine death in radiography is
- Spalding sign
 - Hyper flexion of the spine
 - Appearance of gas shadow in Heart
 - Overlapping of Skull Bones
26. A mother experiences an episode of painless vaginal bleeding during last trimester. The Nurse realize that it is due to
- Abruptio placenta
 - Frequent intercourse
 - Placenta Praevia
 - Excessive alcohol ingestion
27. Muller-Munro Kerr method is clinically used to diagnose
- Contracted Pelvis
 - Cephalopelvic Disproportion
 - Pelvic adequacy
 - Feto maternal disproportion
28. The drug used to enhance lung maturity of fetus in utero is
- Progesterone
 - Surfactant Therapy
 - Duvadilan
 - Dexamethasone
29. The women ask the nurse about the purpose of placenta. The nurse responds as it
- Maintains the body temperature of the fetus
 - Allows for fetal movement
 - Provide an exchange of nutrients and waste products.
 - Acts as a shock absorber
30. Fetal movement is felt at
- 10-12 weeks of Gestation
 - 08-10 weeks of Gestation
 - 16-20 weeks of Gestation
 - 12-14 weeks of Gestation
31. The nurse observes the umbilical cord lengthening & Spurt of blood from vagina. The nurse recognizes these as signs of
- Placenta Previa
 - Abruptio Placenta
 - Placental separation
 - Placenta accrete
